

MP-1932 USB PRESENTATION CONTROLLER

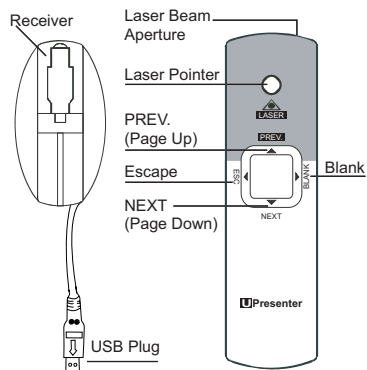

USER'S MANUAL

The USB Presentation Controller is a great tool for professional presentation with Microsoft PowerPoint. You no longer need to stay next to your computer for clicking the keys while making presentation or have an addition person click the slides for you. Walk freely around the room and focus on your presentation instead !!!

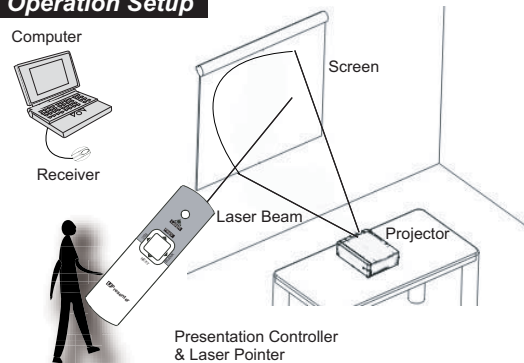

Features

- Laser Pointer with remote presentation controller.
- USB Plug & play, no software required.
- Remote presentation controller allows you to control Microsoft PowerPoint or Word from up to 15 meters away.
- Ergonomic design, easy to carry around.
- Powered by one CR2032 battery

Illustration Of Parts

Operation Setup

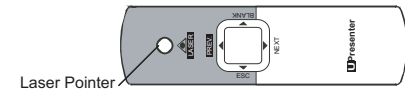

Using the Presentation Controller Functions

1. Connect the USB plug to the PC or Notebook. When the product's USB plug is connected to the PC or Notebook, the page controller is on.
2. The Page Up "PREV" and Page Down "NEXT" buttons function exactly like the PgUp and PgDn buttons on your PC keyboard. It will advance the presentation by one page or go back to the last page respectively.
3. The "BLANK" button when pressed will black out the screen to allow the group to focus on discussion without distraction from the image on the screen. Press the "BLANK" button one more time to resume the normal presentation image.
4. Press the "ESC" button to Exit the Presentation mode.

Note: To ensure optimal performance for MP1932-IR, please do not put any object in front of the receiver and point the product at the receiver while using the page controller function.

Using the Laser Pointer Function

- Press the "LASER" button and the laser beam will be emitted from the aperture. Releasing the "LASER" button will turn off the beam.

Operating Tips

- First, point at the object or information to be highlighted, then switch on the laser by pressing the button. Align the spot.
- Do not keep the laser on for more than a few seconds in order to keep attention. Repeated press will emphasize a point.
- Use only occasionally to maintain high impact.

CAUTION:

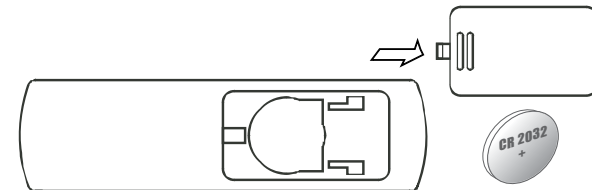

1. Do not stare into the laser beam. Do not direct the beam towards a person's eyes.
2. Avoid dropping the USB Presentation Controller on hard surfaces.
3. Remove battery if USB Presentation Controller is not used for a long period of time.
4. Do not attempt to disassemble or repair by yourself.

WARNING: The USB Presentation Presenter is not a toy.

We recommend that this product not be used by any minor without direct adult supervision. Do not stare directly at the beam or point the laser beam at the eyes of other people or animals. Never project the laser beam toward law enforcement agents, motorists when operating vehicles, or athletes during competition.

Replacing the Battery

- Slide the battery door to open. Remove used battery and insert one new CR2032 battery as shown.
- Replace the battery door.
