Green Laser Pointer MP-1630G

Green Laser Pointer

The MP-1630G Green Laser Pointer with advance in technology, projectors are getting brighter and brighter; use of Large LCD TV for presentation is also becoming common. Use of traditional 650nm RED laser pointer for highlighting is no longer adequate in this situation as the audience can hardly see the dot. The 532 nm Green Laser Pointer is 50 times brighter than the RED laser pointer for the same optical power. This is due to the higher sensitivity of the eye for the Green color. Due to the optical power being still the same, the Green Laser Pointer is thus a more effective alternative to the Red Laser Pointer in presentations. Megapower is pleased to offer the MP1660G elegant metal Green Laser Pointer in <1mW Class II or <5 mW Class IIIa with relevant CE and FDA approvals.

Specifications:-

Laser Power Output	: 1mW max. (Class II) or 5mW max. (ClassIIIa)
Laser Wavelength	: 532nm (GREEN)
Housing	: Metal
Distance	: 1000m (dim environment)
Voltage	: 3.0 V
Battery	: AAA x 2
Dimensions	: 145 (L) x Dia.13 mm
Weight	: 47g including batteries
