MM182 Wireless Microphone with Powerpoint Control Function & Powered Speakers

Wireless Microphone with Powerpoint Control Function & Powered Speakers

This is a versatile wireless microphone amplifier system that can be used in larger venues when audio amplification is required for better audibility. The 40W Stereo Speakers provides balanced, loud and clear audio in large meetings or classroom.

This system comprises of a headset microphone, a remote control microphone with Powerpoint control functions and stereo powered speakers. The elegant speakers can be easily wall-mounted.

The Wireless Microphone uses UHF transmission technology, free from interference from Wifi, Phones and Bluetooth, resulting in clean and stable audio transmission.
