MP-1980/MP1980L Temperature Compensated Ultrasonic Measurer

This Ultrasonic Distance Measurer is your ultimate partner for measuring distance, area and volume in addition to finding direction and leveling with the detachable compass and bubble level. This cool black and yellow tool can instantly measure interior room dimensions from 2 to 50 feet with just a touch of the button. It is temperature compensated to ensure accurate measurement under different ambient temperatures. The MP1980L model comes with laser dot for better target positioning.
